AI Overview

You can easily create an online task graph, timeline, or Gantt chart using free tools like Canva, Miro, or dedicated AI-powered project tools like ChartGen.

Steps to Make a Task Graph Online

- **Choose a platform**: Open a visual workspace or chart maker like Canva or Miro.
- **Select a template**: Search for "Gantt chart", "Work Breakdown Structure", or "Project Timeline".
- **Input your tasks**: Add your task names, start dates, end dates, or dependencies into the built-in table or canvas nodes.
- **Customize and style**: Adjust colors, labels, and layouts to make the workflow easy to read.
- **Export or share**: Download your graph as an image (PNG/JPG) or share a live collaborative link with your team. Canva +5

If you share your **list of tasks** and **timeline or deadlines**, I can help you organize them into a structured text format or recommend the best specific template for your project.
